Daniela Picon Salas

Software Developer

📞 (210) 780 2921   ✉ danielapiconsalas@gmail.com   in [LinkedIn](#)   ⚫ [GitHub](#)   🌐 [Portfolio](#)

As a disciplined software developer with previous social media marketing experience, I bring a comprehensive skill set in full-stack development to the table. Combining my attention to detail and enthusiasm for skill enhancement, I consistently strive to write secure, reliable, and impactful code.

Technical Skills

HTML - CSS - Bootstrap - JavaScript - ES6 - jQuery - Ajax - JSON - RESTful API - REST API - Maven - Java SE - Java EE (Servlets, JSP, J2EE) - File I/O - MVC - Spring Boot - Hibernate - MySQL - Thymeleaf - Object-Oriented Programming (OOP) - Test-Driven Development (TDD) - Version Control with Git - Paired Programming - Agile Methodologies - Debugging - AWS Deployment - Apache TomCat - Unit Testing (JUnit)

Exposure to: Agile Management Tools - KanBan for Workflow - Project Management Tools - Github Pages - NPM - Scrum Stand Up - Documentation - Spring Framework

Soft Skills

Collaborative - Peer Review - Innovative - Strong Communication Skills - Teamwork - Builds Relationships - Initiative - Analytical - Flexibility - Reliable - Integrity - Work Independently - Visualization - Virtualization- Willingness to Learn - Collaborate - Problem Solving Skills - Research Skills - Dedicated - Competitive - Self-motivated - Committed - Team Player - Innovative - Independent - Written and Oral Communication Skills - Culture - Fast Paced

Development Projects

Plantlister: [Live Site](#) | [Repository](#)

A simplified version of Craigslist that allows users to post and browse through plant advertisements. The project provides a functional and user-friendly platform for posting and browsing advertisements, while also providing me with experience in web development, database management, and software testing.

Skills: Paired programming, HTML, CSS, JavaScript, Java, MySQL, and jQuery.

Weather Map: [Live Site](#) | [Repository](#)

A weather application that gives the forecast for locations around the world. The application is designed with a clean and intuitive interface that allows users to quickly and easily access the information they need. The application makes use of the latest weather data to provide hourly and daily forecasts for a variety of metrics, including temperature, precipitation, wind speed, and humidity.
Skills: HTML, CSS, jQuery, AJAX, and OpenWeatherMap API

Movie List Project: [Live Site](#) | [Repository](#)

Designed and developed a web-based movie database. Utilized RESTful API calls to enable CRUD (create, read, update, delete) functionality for dynamically rendered elements, including the use of modals to allow users to delete, add, and edit movies. Users can select individual checkboxes to delete multiple movies at once and edit movie details by title and year.
Skills: Paired programming, JavaScript, HTML, CSS, jQuery, OMDb API

Professional Experience

Toro Lawn Care and Landscaping- San Antonio, TX
Marketing Specialist Feb 2022 - Jan 2023

- Consistently maintained relationships with vendors and clients. Assisted hundreds of clients via email, phone and social media. Answered all their questions, took care of invoices, and managed vendors/clients promptly and effectively.
- Successfully managed tough situations with clients, vendors, and employees which resulted in a high level of customer satisfaction and retention.
- Thoroughly followed instructions and systems set by company standards which led to a smoother workflow.

FreeLance - San Antonio, TX
Marketing Specialist Jun 2021 - Jan 2022

- Launched posts and designed promotional posts which included giveaways, product pictures, and pictures of services the business provides. This led to higher exposure to potential costumes in the area. Clients would engage and book through social media.
- Communicated with 30 customers a day through business social media accounts, helped set up appointments and professionally replied to their needs. This led to a higher percentage of customers booking appointments and buying products.
- Managed social media for local businesses and increased following by 300 followers in three months, which led to more exposure and customers.

Education

Codeup
Certification of Completion   Jan 2023 - Jun 2023
This 5-month coding boot camp teaches full-stack software development through 670 contact hours of hands-on technical training (20% more time than 4-year degree majors require). Students hone skills in modern web technologies, computer science, software engineering, and application architecture while gaining project experience with pair programming, debugging, troubleshooting, agile project management, user stories, feature lists, UI/UX, wireframing, and relational database design.

Northwest Vista College
Associates of Science
2-year Associate of Computer Science offers a well-rounded curriculum that covers essential subjects such as learning framework, composition, mathematics, programming fundamentals, calculus, government, history, and core disciplines
